MANAGEMENT'S DISCUSSION AND ANALYSIS

For the three months ended March 31, 2021
(Expressed in US dollars)

The following is management's discussion and analysis – quarterly highlights ("MD&A") of the results of operations and financial condition of Orsu Metals Corporation (the "Company" or "Orsu") for the three months ended March 31, 2021 and up to the date of this MD&A. The MD&A has been prepared to provide material updates to the business operations, financial condition, liquidity and capital resources of the Company since its last management's discussion and analysis for the fiscal year ended December 31, 2020 (the "Annual MD&A").

This MD&A should be read in conjunction with the Annual MD&A and the audited consolidated financial statements for the year ended December 31, 2020, together with the notes thereto, and the accompanying unaudited condensed interim consolidated financial statements and related notes thereto for the three months ended March 31, 2021 (the "Financial Report").

All financial information in this MD&A is derived from the Company's financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") and all dollar amounts are expressed in United States dollars unless otherwise indicated.

The effective date of this MD&A is May 27, 2021.

Description of the Business

Orsu is a publicly traded company incorporated under the laws of the Province of British Columbia. The Company's shares are listed for trading on the TSX Venture Exchange ("TSX-V") under the symbol OSU. The corporate office of the Company is located at Unit 1 - 15782 Marine Drive, White Rock, B.C., Canada, V4B 1E6.

Orsu owns 90 percent of the Sergeevskoe gold exploration project located in the Zabaikalskiy Region of eastern Russia. The property is leased from the Russian Government until 2031.

The Company is led by an experienced management team that has worked on exploration projects both in Russia and Internationally. Management also notably holds approximately 43 percent of the Company's shares.

Operational Highlights

Inferred resource update

On February 18, 2020 the Company filed a technical report titled: "NI43-101 Technical Report on the Updated Mineral Resource Estimate for the Sergeevskoe Property, Zabaikalskiy Krai, Russian Federation" dated effective January 9, 2020 (the "Sergeevskoe Report") to support the updated resource announced on January 20, 2020.

An Inferred Mineral Resource of 30.42 million tonnes, grading 1.45 g/t gold and containing 1.417 Moz gold at a 0.5 g/t gold cut-off grade and US\$1450 per Troy ounce of gold, was optimized into an open pit constrained by the license boundaries at Sergeevskoe.

Based on the results, as a result of the 2019 exploration programme, Orsu was able not only to double the mineralized footprint to 2x1 km at Sergeevskoe the Company also succeeded in increasing by 19.3% its previously announced maiden Mineral Resource. Due to the size of the limited drilling programme, obvious gaps were left along the strike of mineral wireframes. In addition, the system remains widely open to the west and north.

The Sergeevskoe Report was independently prepared by Wardell Armstrong International Ltd. ("WAI") in accordance with the guidelines of the JORC Code (2012)/CIM Definitions Standards and NI 43-101 requirements and is filed on the Company's profile on www.sedar.com and is also available on the Company's website.

MANAGEMENT'S DISCUSSION AND ANALYSIS

For the three months ended March 31, 2021

(Expressed in US dollars)

Pilot mining program

In 2020, the Company completed a bulk test and pilot mining program at the Sergeevskoe project and processed gold-mineralized material at the neighbouring Alexandrovskoye mine and gold plant. The program was a success in that grade control drilling and subsequent mining confirmed the integrity of our geological model. While gold grades received after more than 35,000 m of grade control drilling provided further support to the grades as per the geological model based on widely-spaced exploration drilling, the width of some mineralized bodies appeared to be wider than modelled and resulted in larger tonnage of oxidized mineralized material.

While the Pilot mining did not generate the income hoped for, the pilot mining proved particularly useful to determine the metallurgical qualities of different types of mineralized material that we find at the Sergeevskoe property. While the Contractor employed a traditional gravitation-flotation-cyanidation processing, we now also believe that direct cyanidation and heap leach approaches are to be investigated as an alternative and, likely, more efficient flow-sheet to extract gold.

The Company's proportion of the gold proceeds net of the Contractor's cost of processing and the mineral extraction tax netted to 198 million Russian Rubles (approximately US\$2.6 million) of which 156 million Russian Rubles (approximately US\$2.0 million) has been received to the date of this MD&A with the final 42 million Russian Rubles (approximately \$0.6 million) expected to be received in June 2021.

2021 Exploration

The Company is planning further metallurgy tests of primary mineralized material at the Sergeevskoe license area. In mid-March 2021, Orsu collected four samples from 2017-2019 drill core for further metallurgy testing at the Klyuchi West, Kozie and Peak Klyuchi domains of the Sergeevskoe mineralized envelope. The tests aim to better understand the distribution of primary mineralized material amenable to direct cyanidation for both plant and heap leach treatment. The tests are expected to be completed in June or July 2021.

Orsu is planning to undertake a geochemical sampling survey covering approximately 5.5 square kilometres outside the area with NI 43-101 resource in the southeast of the Sergeevskoe licence area. Historical trenches and drill holes intercepted gold some 1.5 to 2 km west from the mineralized envelope. The mineralized envelope is also open to the north, with potentially permissive ground open for some 500 m across the strike. This provides an opportunity for significant expansion of the mineralized envelope. It is expected that the geochemical survey will generate new targets and help to better focus new drilling. The geochemical survey work is planned to start in June 2021.

Qualified Person

The Company's Director of Exploration, Alexander Yakubchuk, a Qualified Person as defined in NI 43-101, has reviewed and approved the exploration information and resource disclosures contained in this MD&A.

ORSU METALS CORPORATION

MANAGEMENT'S DISCUSSION AND ANALYSIS

For the three months ended March 31, 2021
(Expressed in US dollars)

Trends

The Company is an exploration company. Issues of seasonality or market fluctuations have had a minor impact on the expenditure patterns. The Company expenses its exploration, project investigation and general and administration costs, and these amounts are included in the net loss for each quarter. The Company's treasury, in part, determines the levels of exploration.

The level of the Company's exploration expenditures is largely determined by the strength of the resource capital and commodity markets and its ability to obtain investor support for its projects.

Results of Operations – three months ended March 31, 2021

The consolidated loss for the three months ended March 31, 2021 was \$244,673 compared to \$454,590 for the three months ended March 31, 2020.

The significant amounts and changes between the current period and the comparative period are discussed below.

Exploration and evaluation expenditures totalled \$157,697 for the current period compared to \$177,272 in the comparative period and relates to exploration work on the Sergeevskoe project.

Salaries and benefits totalled \$102,110 for the current period and are comparable to the prior period of \$96,568. Salaries and benefits relate primarily to the fees of the Company's officers and directors.

Non-cash share-based compensation expense was \$Nil for the period compared to \$117,684 in the comparative period and relates to stock options granted during the period.

Liquidity and Capital Resources

Orsu began the 2021 fiscal year with \$75,088 in cash. During the three months ended March 31, 2021, the Company received \$183,053 from operating activities, net of working capital changes, to end at March 31, 2021 with \$258,141 in cash.

As at December 31, 2020, the Company had working capital of \$725,436. Management estimates that these funds may not provide the Company with sufficient financial resources to carry out currently planned exploration and operations over the next twelve months. Accordingly, the Company may need to seek additional sources of financing. While the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms acceptable to the Company. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern.

In March 2020, the World Health Organization declared COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, has adversely affected workforces, economies, and financial markets globally. It is not possible for the Company to predict the duration or magnitude of the adverse impacts of the outbreak and its effects on the Company's business or ability to raise funds. To date, the COVID-19 pandemic has not affected the progress of the ongoing exploration campaign on the Sergeevskoe Project as the Company is able to conduct its ongoing exploration in this remote area of Russia.

Related Party Transactions

The Company had no other related party transactions other than those incurred in the normal course of business as disclosed in the Financial Report.

Cautionary Note Regarding Forward-looking Statements

This MD&A may include or incorporate by reference certain statements or disclosures that constitute "forward-looking information" under applicable securities laws. All information, other than statements of historical fact, included or incorporated by reference in this MD&A that addresses activities, events or developments that Orsu or its management expects or anticipates will or may occur in the future constitute forward-looking information. Forward-looking information is provided through statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur or continue. These forward-looking statements are based on certain assumptions and analyses made by Orsu and its management in light of its experience and its perception of historical trends, current conditions and expected future developments, as well as other factors it believes are appropriate in the circumstances.

Although Orsu believes such forward-looking information and the expectations expressed in them are based on reasonable assumptions, investors are cautioned that any such information and statements are not guarantees of future realities and actual realities or developments may differ materially from those projected in forward-looking information and statements. Whether actual results will conform to the expectations of Orsu is subject to a number of risks and uncertainties, including those risk factors discussed under "Risk Management" in the above documents incorporated herein by reference. In particular, if any of the risk factors materialize, the expectations and the predictions based on them may need to be re-evaluated. Consequently, all of the forward-looking information in this MD&A and the documents incorporated herein by reference is expressly qualified by these cautionary statements and other cautionary statements or factors contained herein or in documents incorporated by reference herein, and there can be no assurance that the actual results or developments anticipated by Orsu will be realized or, even if substantially realized, that they will have the expected consequences for Orsu.

Forward-looking statements are based on the beliefs, estimates and opinions of Orsu's management on the date the statements are made. Unless otherwise required by law, Orsu expressly disclaims any intention and assumes no obligation to update or revise any forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change, whether as a result of new information, future events or otherwise, and Orsu does not have any policies or procedures in place concerning the updating of forward-looking information other than those required under applicable securities laws. Accordingly, readers should not place undue reliance on forward-looking statements or forward-looking information.
