ORSU METALS CORPORATION

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended June 30, 2022

(Unaudited - Expressed in US dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Orsu Metals Corporation (“Orsu” or the “Company”) is a publicly traded company incorporated under the laws of the Province of British Columbia. The Company’s shares are listed for trading on the TSX Venture Exchange (“TSX-V”) under the symbol OSU. The corporate office of the Company is located at Unit 1 - 15782 Marine Drive, White Rock, B.C., Canada, V4B 1E6.

The Company is engaged in the exploration and, if warranted, development of a mineral resource project in eastern Russia. The Company is considered to be in the exploration stage as it has not placed any of its exploration and evaluation assets into production nor has it generated any revenues from operations.

In February 2022, countries around the world imposed a number of sanctions on Russia in response to its invasion of Ukraine. These sanctions include, but are not limited to, removing certain Russian banks from the Society for Worldwide Interbank Financial Telecommunication (“SWIFT”) messaging system, which will affect the Company’s ability to fund its operations in Russia. The Company has some cash reserves in Russia, but prolonged sanctions may impact the Company’s ability to send additional cash to fund operations in Russia, and specifically maintaining the Sergeevskoe license in good standing. It has been reported that the Government of Russia, in response to the sanctions imposed on its country, have imposed counter sanctions and credibly threatened to expropriate or nationalize Russian companies with significant foreign shareholding when investors’ home governments are “unfriendly” towards Russia, which includes Canada. For these reasons the Company is at risk of losing its Sergeevskoe license and its ability to recover any of its investment.

In May 2022, the Company entered into a non-binding letter of intent (the “LOI”) pursuant to which Orsu will complete a business combination that will result in a reverse takeover and change of business of Orsu (Note 14). The resulting entity will be a global helium explorer and developer with exclusive rights to the Topaz helium project in the USA and a 100% interest in the Tunu helium project in Greenland.

In May 2022, the Company also entered into a share purchase agreement pursuant to which Orsu will sell its 90% interest in the Sergeevskoe gold project to the holders of the other 10% interest in the project (Note 14).

These condensed interim consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business in the foreseeable future. As at June 30, 2022, the Company had working capital of \$10,917. Management estimates that these funds may not provide the Company with sufficient financial resources to carry out currently planned exploration and operations over the next twelve months. Further, there can be no assurances that the proposed transaction (Note 14) will complete as proposed or at all. Accordingly, the Company will need to seek additional sources of financing. While the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms acceptable to the Company. These material uncertainties may cast significant doubt upon the Company’s ability to continue as a going concern.

In March 2020, the World Health Organization declared COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, has adversely affected workforces, economies, and financial markets globally. It is not possible for the Company to predict the duration or magnitude of the adverse impacts of the outbreak and its effects on the Company’s business or ability to raise funds. To date, the COVID-19 pandemic has not had a significant impact on the Company’s operations.

These condensed interim consolidated financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate.

The Company will carry the 10% non-controlling interest until completion of a definitive feasibility study on the Sergeevskoe project, at which point the 10% interest will become a participating interest, subject to dilution. The Company is responsible for funding 100% of all costs until completion of a definitive feasibility study.

The carrying values of the Company's financial instruments are classified into the following categories:

Financial Instrument	Category	June 30, 2022	December 31, 2021
Cash	FVTPL	\$ 119,067	\$ 515,418

- Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The carrying values of receivables and trade and other payables approximate their fair values due to their short-term nature. These financial instruments are classified as financial assets and liabilities at amortized cost and are reported at amortized cost. The carrying value of cash was determined based on Level 1 of the fair value hierarchy. The fair value of the Company's warrant liability is recorded at fair value using Level 3 of the fair value hierarchy.
